Notice of Fee Increase on January 1, 2003

If a reply to a "Notice of Allowance and Fee(s) Due" is filed in the Office on or after January 1, 2003, then the amount due will be higher than that set forth in the "Notice of Allowance and Fee(s) Due" since there will be an increase in fees effective on January 1, 2003. See Revision of Patent and Trademark Fees for Fiscal Year 2003; Final Rule, 67 Fed. Reg. 70847, 70849 (November 27, 2002).

The current fee schedule is accessible from: <http://www.uspto.gov/main/howtofees.htm>.

If the issue fee paid is the amount shown on the "Notice of Allowance and Fee(s) Due," but not the correct amount in view of the fee increase, a "Notice to Pay Balance of Issue Fee" will be mailed to applicant. In order to avoid processing delays associated with mailing of a "Notice to Pay Balance of Issue Fee," if the response to the Notice of Allowance and Fee(s) due form is to be filed on or after January 1, 2003 (or mailed with a certificate of mailing on or after January 1, 2003), the issue fee paid should be the fee that is required at the time the fee is paid. If the issue fee was previously paid, and the response to the "Notice of Allowance and Fee(s) Due" includes a request to apply a previously-paid issue fee to the issue fee now due, then the difference between the issue fee amount at the time the response is filed and the previously paid issue fee should be paid. See Manual of Patent Examining Procedure, Section 1308.01 (Eighth Edition, August 2001).

Questions relating to issue and publication fee payments should be directed to the Customer Service Center of the Office of Patent Publication at (703) 305-8283.

1. Claims 1-20 are allowed.
2. The following is an examiner's statement of reasons for allowance: prior art does not show a connection having an elongated tension member, having first and second ends, the tension member being anchored at the second end, a fastening member attached to said elongated tension member at the first end, a resisting member that receives the elongated tension member and being disposed between the fastening member and the second end of the tension member, an expansion device that receives the elongated tension member there through and is compressively loaded between the fastening member and the resisting member by operation of the fastening member on the tension member, the expansion device having a surrounding sleeve, having two ends, and a central aperture through which the elongated tension member being inserted, wherein a portion of the central aperture is formed as a substantially cylindrical inner surface and wherein at least a portion of the cylindrical inner surface being formed with a thread, first and second bearing members received in the central aperture of the surrounding sleeve and operatively connected to the surrounding sleeve, the first and second bearing members having apertures through which the elongated tension member is inserted, wherein at least one of the bearing members having a cylindrical outer surface formed with a thread that mates with the thread of the cylindrical inner surface of the surrounding sleeve and is connected to the surrounding sleeve only by the mating attachment of the thread on the cylindrical outer surface with the thread of the surrounding sleeve, such that the at least one bearing member can rotate in relation to the surrounding sleeve, the first and second bearing members being formed with outer axial ends

Art Unit: 3637

that protrude out of the surrounding sleeve, the outer axial end of the first bearing member contacting the fastening member, the outer axial end of the second bearing member contacting the resisting member, a torsion spring connecting the first and second bearing members, the torsion spring biasing the first and second members in opposite rotational directions such that said at least one of the bearing members being forced to rotate along the thread of the surrounding sleeve away from the other bearing member and out of the surrounding sleeve, the torsion spring being disposed within the surrounding sleeve.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
